CONCOURSE A/B CONNECTOR AND BHS PROJECT ELECTRICAL OUTAGES - CONCOURSE A AND TERMINAL A/B Outage #2 in Support of Existing Ductbank Demolition

In support of the ongoing Concourse A/B Connector Project (MAA-CO-18-003), an electrical outage is scheduled to take place at Substation A-1 (located in A101A) on the night of Thursday, November 10 into Friday, November 11, 2022. This outage will occur between the hours of 11:00 p.m. and 3:00 a.m. In the event the outage cannot occur on this date, a backup date of Friday, November 11 into Saturday, November 12 has been established.

During this outage, the following electrical loads originating from Substation A-1 will be de-energized and impacts will be experienced in the area of Concourse A and Terminal A/B. The following loads are anticipated to be affected during the outage: Switchboard PPL2TA112 (Room A121) and Switchboard PPL5TA113 (Room AT308).

Impacts anticipated to be experienced during outage:

- General Lighting within the following areas: Concourse A Checkpoint lighting; Public Terminal A/B Ticket Queuing-Passenger Entry; A/B Food Court lighting; Concourse A Food Court; Apron pole lights at A8, A9, A10, and A11; and Concourse A Bag Makeup lighting
- PC Air Gates A9, A10, and A11; Ticketing Counter equipment and GIDs A9, A10 and A11; Southwest Maintenance/ERMC Breakrooms Power and lighting; Power and lighting in Southwest locker rooms near A11; and Gates A10 and A11 potable water/lighting and heat trace
- BHS Outbound Baggage to Concourse A Bag Makeup
- Security Rack within Communication Room A126 (Supplemented by a standby generator)
- Unit Heaters, Exhaust Fans, VAVs, Cabinet Heaters, MODs, snow ice melt control, and AHUs (A-11 and A-8) in the area of Concourse A and portions of Southwest mezzanine
- Power for Men's and Women's Restrooms near Gate A10

Tenant Information Advisory 22-039 Page Two

All tenants should take necessary precautionary measures for the outages noted above. During the power outage, all security systems, life safety systems (to include fire protection and emergency lighting systems) will operate as designed utilizing backup power. Initial outage may note a momentary loss of power for life safety loads that will quickly be restored by the facility emergency generator.

Anyone having concerns with the above notification or specific operational needs should contact construction manager (Clark Construction) prior to the outage:

Adam Senner
Project Manager
703-719-1421
Adam.senner@clarkconstruction.com

Wesley Drake
Assistant Superintendent
240-278-9448
Wesley.drake@clarkconstruction.com

Sayed Sadat CQC Manager 202-683-0809 Sayed.Sadat@clarkconstruction.com

If unexpected interruptions occur during the outage, please contact Building Maintenance Supervisor's office at 410-859-7200.
